

Benefits of BCC membership

Access to expert advice, guidance and support from BCC when you need it. Members enjoy immediate access to the vastly experienced staff working to protect their interests

Receive regular briefing notes to explain the impact of any new Government policy decisions or other regulatory issues

**Benefit from a recognised connection
and influence in Europe via the
European Trade Associations with
their own expertise on EU regulation**

Ensure your views are fed into the heart of the Government's regulatory process through the BCC's regular dialogue with senior decision-makers

**Draw upon the expertise of executives
on diverse issues including energy
and emissions, environment, mineral
planning and health & safety**

Influence policy by playing a part in the specialist committee structure. Feed your views into strategies that have successfully influenced UK Government and the EU, benefitting your sector and company

Benefit from BCC participation in key industry bodies such as the Energy Intensive Users Group, the Emissions Trading Group, the CBI Minerals Group, and many more

**Attend BCC events and seminars,
offering networking opportunities that
bring suppliers and ceramic
manufacturers together**

Get the latest news updates straight to your inbox with regular 'BCC Issues' covering each of the main policy areas, technology / innovation and trade featuring up-to-the-minute advice and views on issues that affect your business

Access the BCC members-only website featuring the latest advice, useful resources to download, policy guidance and news

**Receive free updates on UK industry
production and sales through BCC's
statistics service**

Improve safety performance and boost corporate social responsibility by signing up to the BCC Health & Safety Pledge. Pledge Awards help raise your company's profile!

Draw upon the centralised range of best practice advice that BCC collates from across its UK membership

**Take part in specialist briefings
offering advice and guidance on new
regulations**
